

S-E-C-R-E-T

APPENDIX B

FORMULAS FOR CALCULATING MILITARY MANPOWER

1. Calculations Based on Military Representation in the Supreme Soviet

Basic Calculation

$$\text{total military manpower} = \frac{\text{total number of registered voters}}{\text{total number of deputies to the Supreme Soviet}} \times \text{total number of military deputies to the Supreme Soviet}$$

Variant of Basic Calculation

$$\text{total military manpower} = \text{internal military manpower} + \text{external military manpower}$$

$$\text{internal military manpower} = \frac{\text{total number of registered voters}}{\text{total number of deputies to the Supreme Soviet}} \times \text{number of internal military deputies to the Supreme Soviet}$$

$$\text{external military manpower} = \text{number of special military electoral districts} \times 100,000$$

2. Calculations Based on Military Representation in the Soviet of the Union

Alternative Calculation

$$\text{total military manpower} = \frac{\text{total number of registered voters}}{\text{total number of deputies to the Soviet of the Union}} \times \text{total number of military deputies to the Soviet of the Union}$$

Variant of Alternative Calculation

$$\text{total military manpower} = \text{internal military manpower} + \text{external military manpower}$$

$$\text{internal military manpower} = \frac{\text{total number of registered voters}}{\text{total number of deputies to the Soviet of the Union}} \times \text{number of internal military deputies to the Soviet of the Union}$$

$$\text{external military manpower} = \text{number of special military electoral districts} \times 100,000$$
